ANALYTICS

## Cyber attacks have evolved, but have your defenses and security against them evolved too?

Insurance should help you keep your business protected before and after a cyberattack. We should help you understand what you need to secure your business against ransomware, malware, data breaches and computer crime designed to steal your funds and in the event of a cyberattack, fully co-ordinate your claims response, keep your business online and prevent the next attack.

Insurance should be easy to understand! If we know what you need to do to protect your business against attacks, we should give you those tools and then, provide you with our expertise if that cyberattack does get through your defenses.

### Scan

State of the art information and penetration scan to provide the most accurate coverage possible.

### Quote

Broad and easy to understand cyber insurance with the ability to quote and bind in 90 seconds!

### Claims

An "always on" hotline service that guides you in the minutes after you suspect a cyberattack.

## Business protection to recovery and everything in between.

Waratah Cyber is the first cyber insurance to provide cyber all-risks coverage without the need for an application form. We protect your business against your monetary loss caused by:

A cyberattack against your business or its website by external or inside parties, including malware, phishing or ransomware.

**We understand that your loss might look very different to other companies, so we work with you to manage your business from the moment you contact us.**

Your loss of a laptop or mobile phone that causes your business accidentally to lose its data or the personal information of your business' customers.

**We understand that as a small business, remote working is key to you, so we also help you understand how to keep it secure.**

A cyberattack against your business' cloud provider by malicious external parties that causes the cloud provider accidentally to lose your business' data or the personal information of your business' customers.

**We know that sometimes it doesn't matter how secure you are; sometimes, you are only as secure as your vendors.**

**In just 90 seconds, we provide you with insight into your cyber defenses, rate, quote, and bind in a fully automated process.**

## Your monetary loss can include, for example...

Funds your business loses due to a fraudulent funds transfer arising from a cyberattack.

Loss caused by a shutdown of your business' computer network arising from a cyberattack.

Loss or damage others may accuse you of causing because of a cyberattack on your business.

## Unlike other insurance, we don't define what losses you might suffer; every one of our clients is different, and no two cyber attacks are ever the same.

So after a quick, easy, automated look at your business's website, we give you some technical help on your cyber security, and with a simple and easy to understand insurance policy, we give you protection against cyber attacks that cause you monetary loss through:

- Property damage to you or damage you cause others following a cyberattack
- Your website or computer systems being blocked or taken down
- Your personal injury caused by a cyberattack
- Loss of your data or sensitive data of your clients
- Cyber terrorism or crime gangs
- Pollution
- Crime
- Ransomware

## 24/7 claims service provided by industry experts who make it their business to get you back to yours
