

# Energy, Industrial, & Utility RS (EIURS)

EIURS launched in 2015. Core products include primary and excess casualty for the Energy sector focusing on contractors, consultants, and manufacturers. The program has expanded to include Inland Marine, Workers Compensation, and Marine of the Energy sector.

The team has a limited wholesale distribution network which supports the continued growth of this program. Scott and the management team have created an underwriting team concept which allows for the recruitment of young underwriting talent, oversight/training, succession planning, and scalability. In addition, the team continues to explore areas for product enhancements and expansion which continues to drive its strong organic growth.
